

MUBASHSHERA ANJUM SAJIDKHAN

+919359648859 | mubashsherakhan36@gmail.com | [LinkedIn](#) | [GitHub](#) | Jalgaon, Maharashtra

A Motivated B.Tech Computer Science (Data Science) undergraduate equipped with foundational skills in predictive modeling, statistical learning, and natural language processing. Proven ability to construct machine learning pipelines, execute data engineering workflows, and integrate AI APIs. Seeking to apply quantitative problem-solving and algorithmic thinking to deliver intelligent, scalable data solutions in a high-performance environment. / [Portfolio](#)

EDUCATION

B.Tech. – Computer Science & Engineering (Data Science)

- Shri Sant Gadge Baba College of Engineering & Technology, Bhusawal.
- 2023 – 2027 / CGPA: 7.4/10

SKILLS

- **Core Languages & Frameworks:** Python, Pandas, NumPy, Matplotlib, Scikit-Learn, SQL, HTML, CSS
- **AI & Architecture:** Claude API, Tavily APIs, Agent Development Kit (ADK)
- **Developer Platforms:** Git, GitHub, VS Code, Jupyter Notebook, Google Colab, Streamlit, Kaggle

EXPERIENCE

Development Intern / III Robotics – Jan 2026(Present)

- Managed the validation and processing of internal structured datasets to ensure high data integrity, quality, and consistency across core engineering systems.
- Developed fluid, responsive client-side interfaces using React.js, HTML, CSS, and Java Script, ensuring seamless integration with backend data structures.
- Documented technical workflows and component updates to streamline knowledge-sharing, optimize team collaboration, and accelerate development cycles.

PROJECTS

AI-Powered Plagiarism Detector / Python · Tavily AI API · NLTK · Streamlit

Engineered a web application that evaluates text duplication across documents by combining Jaccard similarity heuristics with NLP processing. Built an automated text pipeline featuring tokenization and stopword removal, and deployed the tool on Streamlit with an interactive UI for real-time reporting.

Customer Churn Prediction / Python · Scikit-Learn · Pandas · NumPy · Streamlit · Kaggle Dataset

A Machine Learning project that predicts whether a telecom customer is likely to churn (cancel their subscription), based on their account and usage profile. Includes an interactive Streamlit dashboard for live predictions.

CERTIFICATIONS

- **Deep learning with Python** – Infosys Springboard(2026)
- **Data Visualization with Tableau** – Infosys Springboard(2026)
- **Introduction to Java** — Infosys Springboard(2024)
- **Data Structures and Algorithms** — Infosys Springboard (2024)
- **Introduction to Python** — Data Flair(2024)
- **Python for Data Science** — Great Learning(2024)

ACHIEVEMENTS&ACTIVITIES

- **3rd Position** —Software Exhibition, IT Fiesta National Level Technical Event, IMR College, Jalgaon
- **Poster Presentation** — Pinnacle National Level Technical Event, G. H. Raisoni College of Engineering and Management, Jalgaon
- **Certificate of Appreciation** – Coordinator during the AMP National Talent Search(NTS
- **2nd Prize** – Science Day Poster Presentation, SSGB College of Engineering and Technology, Bhusawal
